EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE CLAIMS

Claim 8, line 2, "3A/dm²" has been deleted and replaced with -- 3 A/dm² --.

Claims **12-20** have been cancelled.

This application is in condition for allowance except for the presence of claims 12-20 directed to an invention non-elected without traverse. Accordingly, claims 12-20 been cancelled.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims **1-11** are allowable over the prior art of record because the prior art does not teach or suggest a method for manufacturing a surface mountable laminated circuit protection device, comprising the steps of providing, performing, laminating, performing and setting as presently claimed, esp., the step of providing a double-sided metal foil clad substrate comprising a first metal layer, a first insulating layer disposed on said first

Art Unit: 1753

metal layer and a second metal layer disposed on said first insulating layer, wherein said first metal layer and said second metal layer are conducted to each other by a plated through hole which penetrates through said first insulating layer, said first metal layer is further divided into a first unit and a second unit, and said first unit and said second unit are separated and insulated from each other.

The prior art does not contain any language that teaches or suggests the above. *Zhang et al.* and *Chiang et al.* does not provide a double-sided metal foil clad substrate comprising a first metal layer, a first insulating layer disposed on said first metal layer and a second metal layer disposed on said first insulating layer, wherein said first metal layer and said second metal layer are conducted to each other by a plated through hole which penetrates through said first insulating layer, said first metal layer is further divided into a first unit and a second unit, and said first unit and said second unit are separated and insulated from each other. Therefore, a person skilled in the art would not have been motivated to adopt the above conditions, and a prima facie case of obviousness cannot be established.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
